```
trigger taskTrigger on Task (before delete) {
    if (trigger.isbefore == true && trigger.isdelete == true ){
        taskHandler.preventTask(Trigger.old);
    }

}
```

```
public class taskHandler {
    public static void  preventTask( List <Task> tasklist){
        List <id> adminids = new list <id>();
        List <user> adminList = [select id from user where profile.Name = 'System Administrator'];
        if(!adminList.isEmpty()){
            for(user u : adminList){
                adminids.add(u.id);
            }
        }
        for (task t :tasklist){
            if(!adminids.contains (userInfo.getUserId())){
                t.addError('you do not have permission to delete');
            }
        }
    }

}
```
